IHCP makes pharmacy benefit information readily accessible on provider website

The Indiana Healthcare Coverage Programs (IHCP) updated the [Pharmacy Services](#) Quick Link at indianamedicaid.com to include hyperlinks to pharmacy information for each of the managed care entities (MCEs). Providers can now more readily access the preferred drug lists (PDLs), prior authorization (PA) criteria, and other pharmacy benefit information for Healthy Indiana Plan (HIP), Hoosier Care Connect, and Hoosier Healthwise (HHW) members. A link to OptumRx continues to be available for pharmacy benefit information for fee-for service (FFS) members. The Quick Links navigation panel, shown in Figure 1, appears in the provider website banner for easy access.

- Income limits now calculating correctly for presumptive eligibility applications

Income limits now calculating correctly for presumptive eligibility applications

The Indiana Health Coverage Programs (IHCP) previously identified that the federal poverty level (FPL) income limit calculation for determining presumptive eligibility was computing incorrectly. As a result, some applicants were either erroneously denied eligibility altogether or were approved only for limited coverage under the Family Planning Eligibility Program. As an interim solution, providers were advised to submit requests for a follow-up review of any presumptive eligibility determination they believed may have been in error.

This issue has been resolved. Presumptive eligibility income limit calculations are now computing correctly. Please contact PresumptiveEligibility@fssa.IN.gov with any questions or concerns.
