INDIANA HEALTH COVERAGE PROGRAMS    BT201130    JUNE 7, 2011

## How to report member disease state for enrollment in *Care Select*

Effective July 1, 2011, Medicaid providers will be able to contact the enrollment broker (EB), MAXIMUS, to report when a patient is diagnosed with a disease state that may qualify him or her for *Care Select*. Providers will use the Indiana *Care Select* Disease Management Program Provider Referral Form to notify the EB of the potentially eligible patient.

*Care Select* is designed to improve a member's health status, enhance quality of life, and improve client safety, client autonomy, and adherence to treatment plans. Membership provides the advantages of a designated primary physician to act as a health steward in using evidence-based medicine, best practices, and practice-based evidence to manage services by duration, scope, and severity.

Medicaid members must have at least one of the following diseases as a criterion for *Care Select* membership:

- Asthma
- Diabetes
- Heart failure

[Continue](#)

- Congestive heart failure
- Hypertensive heart disease
- Hypertensive heart and kidney disease
- Rheumatic heart illness
- Severe mental illness
- Serious emotional disturbance (SED)
- Depression

If a referred member meets the eligibility criteria (qualifying disease state and aid category) for *Care Select*, the EB will reach out to the member to determine whether the member wants to participate. If the member chooses to opt in to the *Care Select* program, the member is required to choose a *Care Select* primary medical provider (PMP). After 60 days of unsuccessful outreach, the eligible *Care Select* member will be auto-assigned to a *Care Select* PMP. Please refer to the [Care Select page](#) at indianamedicaid.com for more program information.

The Indiana *Care Select* Disease Management Program Provider Referral Form is available on the [Forms page](#) at indianamedicaid.com. Providers can fax the completed form to MAXIMUS at (317) 238-3120.
