Emergency Services

Note: For policy information regarding coverage of emergency services, see the [Medical Policy Manual](#) at [indianamedicaid.com](#).

Introduction

In accordance with *Indiana Code IC 12-15-12-0.5*, emergency services are covered inpatient and outpatient services that are:

- Furnished by a provider qualified to furnish emergency services
- Needed to evaluate or stabilize an emergency medical condition

Per *42 U.S.C. § 1395dd(e)(1)*, an emergency medical condition is a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson, who possesses an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in the following:

- Placing the health of the individual or, with respect to a pregnant woman, the health of the woman or her unborn child in serious jeopardy
- Serious impairment to bodily functions
- Serious dysfunction of any bodily organ or part

Emergency Service Coverage and Billing

The Indiana Health Coverage Programs (IHCP) provides coverage for emergency services. Guidelines for these services are subject to the member's program enrollment.

Note: For Healthy Indiana Plan (HIP), Hoosier Care Connect, and Hoosier Healthwise members, providers must contact the appropriate managed care entity (MCE) for specific policies and procedures. MCE contact information is included in the [IHCP Quick Reference Guide](#) available at [indianamedicaid.com](#).

Providers should bill for emergency services using the appropriate type of claim for their provider type and specialty. For example, facilities should bill using the institutional claim (*UB-04* claim form, IHCP Provider Healthcare Portal [Portal] institutional claim, or 837I electronic transaction), and physicians should bill using the professional claim (*CMS-1500* claim form, Portal professional claim, or 837P electronic transaction).

For information about emergency services related to specific specialties, see the appropriate module: [Inpatient Hospital Services](#), [Dental Services](#), [Pharmacy Services](#), [Hospice Services](#), or [Transportation Services](#).

Exclusions for Prior Authorization, Referrals, and Copayments

Emergency services as defined in this document do not require prior authorization (PA). However, any inpatient stay resulting from an emergency admission *does* require PA, with the exception of stays for burn care with an admission of type 1 (emergency) or type 5 (trauma). To receive IHCP reimbursement, emergency inpatient admissions must be reported to the PA contractor within 48 hours of admission, not including Saturdays, Sundays, or legal holidays.

Emergency services are self-referral services. Members on restricted utilization through the Right Choices Program may receive treatment without a referral from the authorized provider if the diagnosis is an emergency diagnosis. Members enrolled in the HIP, Hoosier Care Connect, or Hoosier Healthwise managed care programs can seek emergency care from providers not contracted with the MCE without authorization, subject to the *prudent layperson standard* for emergency medical conditions.

Emergency services are excluded from copayment requirements.

Package E Members

Coverage for Package E—Emergency Services Only members is limited to *only* emergency services. For these members, services must meet the emergency criteria noted in the [Introduction](#) section to be eligible for IHCP reimbursement. In the case of pregnant women eligible for coverage under Package E, labor and delivery services are also considered emergency medical conditions. For more information about Package E eligibility and benefit criteria, see the [Member Eligibility and Benefit Coverage](#) module.

Covered services for Package E members are reimbursed under the fee-for-service delivery system. When billing for Package E members, providers must indicate in the appropriate field on the claim that the service rendered meets the definition of an emergency service. See the *Emergency Services Only (Package E) Billing* section of the [Claim Submission and Processing](#) module for specific Package E billing instructions for each claim type.

Post-Stabilization Care Services for Managed Care Members

Post-stabilization care services are covered services related to an emergency medical condition that are provided after a member is stabilized, to maintain the stabilized condition or to improve or resolve the member's condition.

For managed care members, the member's MCE is financially responsible for post-stabilization care services for members under any of the following circumstances:

- The services are preapproved by a representative of the member's MCE.
- The services are not preapproved but are administered to maintain the member's stabilized condition within one hour of a request for preapproval of further post-stabilization care services.
- The services are not preapproved, but are administered to maintain, improve, or resolve the member's stabilized condition if any of the following occur:
 - The MCE representative does not respond to a request for preapproval within one hour.
 - The MCE representative cannot be contacted.
 - The MCE representative and the treating physician cannot reach an agreement concerning the member's care, and a physician representing the MCE is not available for consultation.

If the MCE representative and the treating physician cannot reach agreement, the MCE allows the member's treating physician an opportunity to consult with a physician representing the MCE. The treating physician may continue with care of the member until a physician representing the MCE is reached or until one of the following criteria is met:

- A plan physician with privileges at the treating hospital assumes responsibility for the member's care.
- A plan physician assumes responsibility for the member's care through transfer.
- The MCE and treating physician reach an agreement concerning the member's care.
- The member is discharged.

Emergency Department Coverage and Billing

The IHCP provides reimbursement to emergency department physicians who render emergency services to IHCP-eligible members, as described in this document and in *IC 12-15-15-2.5*.

Claims for related services (such as facility charge, lab, and x-ray) provided in an emergency room setting must include a principal diagnosis code that supports the emergency nature of the service; otherwise, the IHCP may suspend the claim for review to determine whether the prudent layperson standard has been met. If the IHCP review determines that the prudent layperson standard has not been met, the IHCP will deny the claim.

IHCP members may seek emergency services, as defined in the [Introduction](#) section, in the emergency department of any hospital in the United States that is an enrolled Medicaid provider (either for Indiana or for the state in which it is located). IHCP members cannot be directly billed for emergency services provided in the emergency room of any hospital that accepts Medicaid.

Emergency Department Screenings

The IHCP covers services for a member presenting to an emergency department with an emergency medical condition, as determined by the screening physician. When the screening does not meet the definition of an emergency visit, using the layperson review criteria, the provider should bill only for the screening service.

Current Procedural Terminology (CPT^{®1}) codes 99281–99285 reflect the appropriate level of emergency department screening exam that providers must bill on a professional claim (*CMS-1500* claim form, Portal professional claim, or 837P transaction). For definitions of these codes, see *Emergency Services Codes* on the [Code Sets](#) page at indianamedicaid.com.

Nonemergency Services Provided in an Emergency Department

The IHCP does not reimburse hospitals for nonemergency services rendered in emergency room settings. Hospitals are reimbursed for screenings that are necessary to determine whether the member has an emergency condition. Revenue code 451 – *EMTALA – Emergency Medical Screening Service* is reimbursed for the nonemergent screening. All ancillary charges submitted with revenue code 451 will be denied, with the explanation of benefits (EOB) code 4180 – *When revenue code 451 is billed on an outpatient or outpatient crossover claim, all other services billed are not payable*.

HIP, Hoosier Care Connect, and Hoosier Healthwise Package A enrollees are required to pay a copayment for nonemergency services provided in the emergency department, with exemptions for the following services and categories of members:

- Family planning services
- Inpatients in hospitals, nursing facilities, intermediate care facilities for individuals with intellectual disability (ICFs/IID), or other medical institutions
- Children 18 years old and younger
- Pregnant women
- Women enrolled in the Breast and Cervical Cancer Program (BCCP)
- Native Americans or Alaska Natives

¹ CPT copyright 2016 American Medical Association. All rights reserved. CPT is a registered trademark of the American Medical Association.

Per federal regulations, IHCP providers may not deny services to any member due to the member's inability to pay the copayment on the date of service. This federal requirement does not apply to a member who is able to pay, nor does a member's inability to pay eliminate his or her liability for the copayment. It is the member's responsibility to inform the provider that he or she cannot afford to pay the copayment on the date of service. The provider may bill the member for copayments not made on the date of service.

See the [Member Eligibility and Benefit Coverage](#) module for more information about copayment policies.
