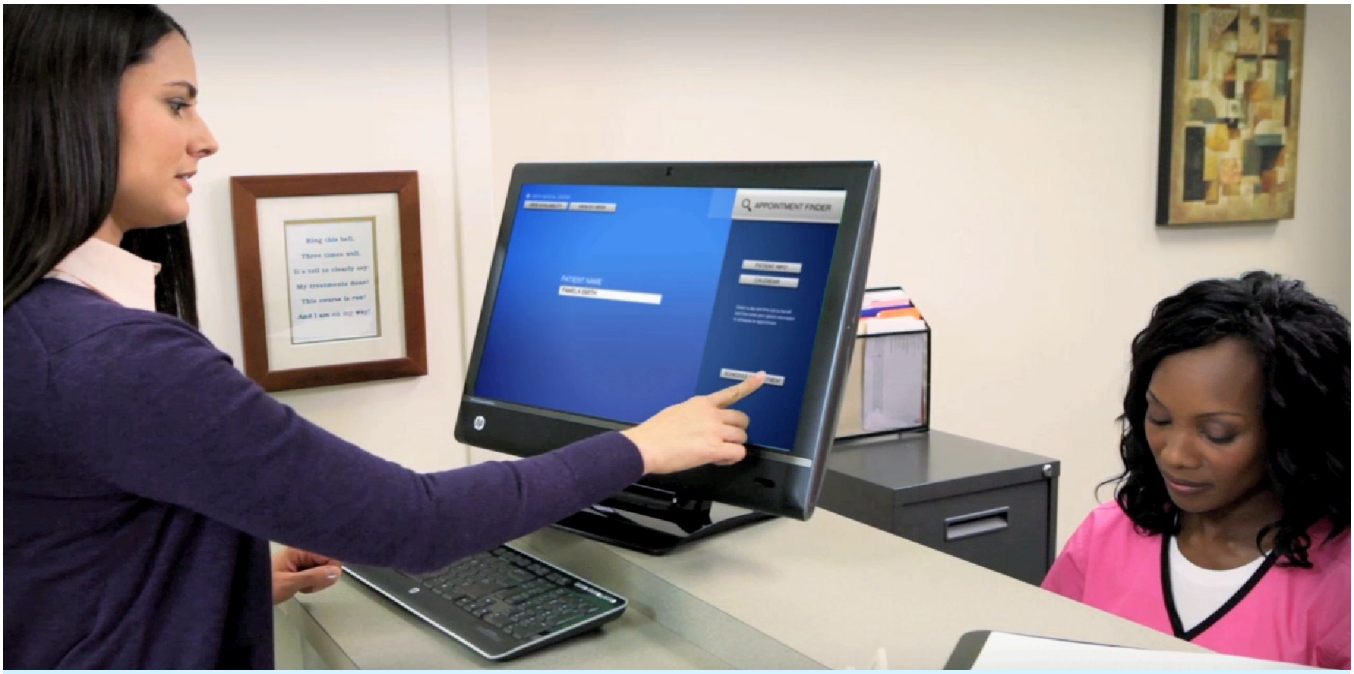
INDIANA HEALTH COVERAGE PROGRAMS BR201310 MARCH 12, 2013



Age restriction correction for procedure code D1204

Effective September 26, 2012, changes were made to the system logic regarding age restrictions to begin adjudicating claims based on days, months, and years of age. This change was announced in BR201233, dated August 14, 2012. The Indiana Health Coverage Programs (IHCP) has determined that the age restriction for dental procedure code D1204 – *Topical application of fluoride-Adult* was redefined incorrectly at that time. The age restriction for this code has been corrected in the system to reflect: Members age 12-20 years.

Claims for this procedure with dates of service from September 26, 2012, through December 31, 2012, (code end-date), that denied for explanation of benefits (EOB) 4034 – *Procedure code billed not compatible with recipient's age; please verify and resubmit* will be mass adjusted and reprocessed. Adjustments will begin appearing on the provider Remittance Advice (RA) dated March 26, 2013, with internal control numbers (ICNs) that begin with region code 56 (mass adjusted) or 80 (mass reprocessed). If the adjustment finds a claim was underpaid, the net difference is paid and reflected on the RA.

CPT code 87653 linked to revenue code 306

Effective April 15, 2013, the Indiana Health Coverage Programs (IHCP) will link Current Procedural Terminology (CPT®[1]) code 87653 – *Infectious agent detection by nucleic acid (DNA or RNA); streptococcus, group B, amplified probe technique* to revenue code 306 – *Bacteriology lab*. For reimbursement consideration, providers may bill the procedure code and revenue code together, as appropriate, for dates of service (DOS) on or after April 15, 2013.
