MAY 24, 2016

## Billing ADA CDT code D2394 requires services to four or more tooth surfaces

The Indiana Health Coverage Programs (IHCP) has identified a claims processing issue that allowed claims for American Dental Association (ADA) Current Dental Terminology (CDT®<sup>1</sup>) code D2394 – *Resin-based composite – 4 or more surfaces, posterior, permanent* to process and pay when three tooth surfaces were billed. The procedure description for D2394 has not changed and requires treatment to four or more surfaces.

The claims processing system has been corrected. Effective immediately, claims for D2394 billed for fewer than four tooth surfaces will deny with explanation of benefits (EOB) 266 – *The number of valid tooth surface codes present does not meet the minimum number required for the procedure code billed.*

<sup>1</sup>Current Dental Terminology (CDT) is copyrighted by the American Dental Association. 2015 American Dental Association. All rights reserved.

## IHCP will change the status for HCPCS codes A9544, A9545, and G3001 to noncovered

The status for the following Healthcare Common Procedure Coding System (HCPCS) codes will be changed from covered to noncovered, effective immediately:

- A9544 – *Iodine I-131 Tositumomab, diagnostic, per study dose*
- A9545 – *Iodine I-131 Tositumomab, therapeutic, per treatment dose*
- G3001 – *Administration and supply of Tositumomab, 450 MG*

Bexxar, the drug covered by these codes, was discontinued by the manufacturer in 2013. The claims processing system will be updated to reflect the discontinuation. No claims are affected by this change. The coverage update will be reflected in the next monthly update to the provider [Fee Schedule](#) at [indianamedicaid.com](http://indianamedicaid.com).
