Subject: HIPAA Provider Workshops

The Office of Medicaid Policy and Planning (OMPP), Children's Health Insurance Program (CHIP) Office, and EDS are offering Indiana Health Coverage Programs (IHCP) Health Insurance Portability and Accountability Act (HIPAA) workshops free of charge. The first HIPAA workshops during March, April, and May 2003 covered the HIPAA 270/271 transactions and trading partner agreements. The upcoming workshops are being offered during June, July, and August 2003 and cover additional HIPAA-related transactions and topics affected by HIPAA changes. A brief HIPAA-readiness survey will also be distributed at the workshops. Sessions cover critical information that becomes effective October 16, 2003. The following topics will be covered:

- 837 Institutional, Professional, and Dental Transactions
- Paper Claims
- Attachments
- Local Codes
- 276/277 Transactions
- 835 Transaction
- Anesthesia Billing

Attendees should choose to attend workshops based on their claim billing type (UB-92, CMS-1500, or ADA-2000). All topics listed above are offered to all attendees each day with the exception of anesthesia billing, which is only offered to professional, or CMS-1500, billing type providers. Tables 1 and 2 provide session information and locations. Workshops begin promptly at 8:30 a.m. **local** time with the exception of the June 12 session in Indianapolis that begins at 9:30 a.m. Workshops end at 5 p.m. Lunch breaks are one hour and lunch is not provided.

Workshops are being offered during June, July, and August 2003 at the following locations:

- Lafayette, IN
- East Chicago, IN
- Jeffersonville, IN
- Indianapolis, IN
- Evansville, IN
- Muncie, IN
- Ft. Wayne, IN
- Terre Haute, IN
- Columbus, IN
- South Bend, IN

Additional workshops will be offered in southern Indiana during June, July, or August 2003. The dates and locations of these workshops have yet to be determined. When this information is confirmed, it will be published in an upcoming banner page article. Providers who do not receive banner pages can check the IHCP Web site at www.indianamedicaid.com for this information.

General directions to workshop locations are available on the IHCP Web site listed above. To access directions from the Web site, click **Provider Services**, **Education Opportunities**, and **Provider Workshops**. Please consult a map or other location tool for directions from a specific location.

Seating for the workshops is limited to two registrants per provider number. Fax completed registration forms to EDS at (317) 488-5376. EDS processes registrations chronologically based on the date of the workshop. A letter or fax confirming registration will be sent prior to the workshop. Confirmations may be received as late as two days prior to the workshop. Direct any questions about the workshops to a provider representative at (317) 488-5195.

Table 1 – Session Information

Topic	Description
837 Institutional, Professional, and Dental Transactions	This session provides information about electronic claims submission to the IHCP. There are three 837 transactions; professional, institutional, and dental. The focus of the session depends on the claim billing type scheduled for review on the workshop date. The UB-92 will be reviewed on institutional workshop days, the CMS-1500 on professional workshop days, and the ADA 2000 on dental workshop days. Topics include a brief discussion about the purpose and use of the implementation guides, the IHCP companion guides, the IHCP required data elements and format, and a review of trading partner responsibilities.
Paper Claims	The IHCP is modifying the field locator use and content of all three paper claim forms used by the IHCP; the UB-92, the CMS-1500, and the ADA 2000. This session covers claim use and content with a field-by-field review of each claim type. The focus of the session depends on the claim billing type scheduled for review on the workshop date. The UB-92 will be reviewed on institutional workshop days, the CMS-1500 on professional workshop days, and the ADA 2000 on dental workshop days. <i>Dental providers please note: The ADA 2000 claim form will become the approved version for dental paper claim submission starting August 2003. No other dental claim forms will be accepted after the paper claim revision implementation date.</i>
Attachments	HIPAA allows submission of electronic claims with paper attachments. The paper attachments can be mailed to the IHCP and linked to the electronic claim for processing. Because of this, the IHCP is mandating use of the <i>IHCP Attachment Cover Letter</i> for submission of paper attachments. This session describes HIPAA guidelines for development of attachment control numbers, identification of the appropriate report-type codes, and completion of the attachment cover letter. This session also reviews new guidelines for submitting paper claims with attachments.
Local Codes	HIPAA requires standardized procedure coding and mandates eliminating local codes for electronic claims. Because of this, the IHCP is eliminating the use of all local codes for claims with dates of service on or after October 16, 2003. This session provides a broad overview of changes resulting from elimination of local codes. The session also describes the status of the elimination of local codes. During upcoming HIPAA workshops in August and September 2003, detailed sessions will include a list of cross-walked codes and changes to any specific billing requirements.

Table 1 – Session Information

276/277 Transactions	The 276/277 transactions session describes all options available or supported by EDS using the new HIPAA standard 276 (<i>Claim Status Request</i>) and the 277 (<i>Claim Status Response</i>) formats. Both batch and interactive claim status transactions are discussed. Other topics discussed include content and format compliance, minimum data elements, code sets, and Web interChange.
835 Transaction	The 835 transaction session describes changes to the current paper remittance advice and implementation of the electronic 835 transaction. Several topics are covered including claims data reporting changes, claim (header) versus service (detail) line item adjusting, and provider level balancing.
Anesthesia Billing	The administrative simplification final rule mandates the use of the Current Procedural Terminology (CPT) anesthesia codes for billing anesthesia services to a health plan. This session describes changes to anesthesia billing instructions and pricing methodology, and converting surgical procedure codes to anesthesia codes.
