

PROVIDER BULLETIN

BT 200406

MARCH 26, 2004

**To: All Pharmacy Providers and Prescribing Practitioners**

**Subject: New Policy—Mandatory 90-Day Supply for Selected Maintenance Medications and Updated Pharmacy Copay Information**

*Note: The information referenced below is not directed to those providers rendering services in the risk-based managed care (RBMC) delivery system.*

## Overview and Background

As part of ongoing review of program policy and operations, it was determined that efficiencies could be gained and costs conserved by implementing a “days supply” limitation for selected maintenance medications. Such a policy would mirror those typically used in the private sector. The Indiana Medicaid Drug Utilization Review Board reviewed and approved the proposed initiative, and this bulletin is to notify providers of the particulars of the new policy and the implementation date of it.

Effective May 11, 2004, pharmacy providers will be required to dispense a 90-day supply of selected maintenance medications for Indiana Medicaid recipients. *Selected maintenance medications* are those medications that are included in the listing in Table 1. Please note that providers will receive advance notification of any modification to this listing.

## Affected Recipients

All fee-for-service Medicaid recipients will be affected by this policy, with the exception of those individuals residing in nursing facilities and intermediate care facilities for the mentally retarded (ICFs/MR); the new policy does not apply to those recipients. The identification of a Medicaid recipient as belonging to one of these excluded categories will be by way of the recipient’s eligibility information on file with ACS, the State’s Pharmacy Benefits Manager.

## Details

The provider will be prompted to dispense a 90-day supply of a selected maintenance medication if 14 days or greater of therapy with one of the selected maintenance medications within the last 18 months is found in the patient’s medication claims history. Conversely, claims will be allowed for a day supply of less than 90 days if the claims history reveals less than 14 days of therapy with one of the selected

BT200406

March 26, 2004

maintenance medications within the last 18 months. The net effect of this exemption is to allow for a trial use of the medication prior to mandatory dispensing of a 90-day supply of these medications.

If the prescription is not written for sufficient quantity, or the number of remaining refills is insufficient to dispense a 90-day supply, the provider should enter a value of "MN" (Insufficient Duration) in the **Reason for Service Code** (field 439-E4). The provider should concurrently use the appropriate **Professional Service Code** (field 440-E5) to indicate the action taken. The **Result of Service Code** (field 441-E6) should be used to indicate the outcome of the action taken.

All claims that fail the systems edit enforcing this new policy will receive NCPDP edit 88 with an exception code of 4653.

## Updated Pharmacy Copay Information

Effective May 1, 2004, in accordance with a change to Indiana Medicaid rule 405 IAC 5-24-7, the Indiana Medicaid drug copay will be \$3.00 for each drug dispensed. This applies to covered legend drugs and over-the-counter (OTC) drugs (both brand name and generic), as well as compounded prescriptions. All other drug copay policies remain unchanged. Please direct any questions to the ACS Pharmacy Services Helpdesk at 1-866-645-8344.

## Program Assistance

All questions regarding this new policy and bulletin should be directed to the ACS Pharmacy Services Helpdesk at 1-866-645-8344.
